

IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~strikethrough~~.

Please REPLACE paragraph [0002] with the following amended paragraph [0002]:

The present invention relates to a power supply for a motor, and more particularly, to a motor power supply device which reduces a redundant usage of components and provides a satisfactory value of resistance for motor speed of a brake circuit by sharing a dynamic braking circuit and an inverter. Whereby, size of products and a manufacturing expense thereof can be reduced.

Please REPLACE the paragraph [0038], line 4, with the following paragraph:

from "...terminal 80a an 80b..." to "...terminal 80a and 80b..."
